

FRESH MILL

The frozen herb mill

Dismantling

- Turn the bottom of the mill, so as the « PUSH » buttons appear in front of the oval windows.
- Push the buttons, while pulling the transparent body, to separate the two parts.
- Remove the grater and unscrew the white disk.
- All the pieces of Fresh Mill are dishwasher-safe.

Assembling

1. Place the grater and its threaded axis at the base of the transparent body.
 2. Engage the colored bottom of the mill on these pieces, then push and turn until it clicks for lockage.
 3. Fill up your Fresh Mill with fresh, washed and carefully drained herbs. Maximum 50 g/1.8 oz.
 4. Engage the white disk into the threaded axis, nut upside, and push to gently press the herbs..
 5. Tightly close the Fresh Mill with its cap and lid and place it in the freezer (ca. 5 hours at -18°C/0°F).
 6. Fresh Mill easily minces your frozen herbs, just the desired quantity. For an optimal result, it is important that the herbs are deep-frozen.
 7. After use, quickly replace the Fresh Mill in the freezer. Do not re-freeze a thawed product.
- A. Fresh herbs, while freezing, can adhere to the wall of the mill and block its mechanism. In that case, slide the plastic card between the wall and the herbs to break the ice.
- B. For the first use, we recommend to fill the Fresh Mill only half.
